## Services we Provide

### Sprinkler Irrigation

➡ Sprinkler Irrigation is a method of applying irrigation water which is similar to natural rainfall

### Raingun Irrigation

➡ A Rain gun is a high performance micro-irrigation device and it is designed for a variety of uses and applications where relatively high flows and extended radius of the water throw are desired.

### Drip Irrigation

➡ Drip Irrigation involves placing tubing with emitters on the ground along side the plants. The emitters slowly drip water into the soil at the root zone. Because moisture levels are kept at an optimal range, plant productivity and quality improve.

## Landscape Irrigation System

### Fountains

➔ A Device or Structure that sends a stream of water into the air in a garden .A fountains symbolizes life, truth,change and water.Fountains and water sources have played an important role in the history and are essential to life.Even water itself is the symbol of purification.

### Automated Sprinkler System

# ADVANCE IRRITECH

## Landscape Irrigation System

- ➡ An Automatic sprinkler system is a property improvement project worth considering. Not only will it help to maintain a healthy beautiful landscape, but it's the most convenient and efficient way to ensure your landscape gets the water it needs without over or under watering. When it is properly installed and maintained, an automatic sprinkler system will help to conserve water too.
- ➡ In fact, professionally installed automatic sprinkler system is one of the best investments that you can make for your property. Just ask anyone who has one. There is no easier and most cost effective way to beautify your landscape.

### Why Purchase Rainbird Automatic Sprinkler System?

- ➡ Saves TIME
- ➡ Saves WATER
- ➡ Saves MONEY

### How Automatic system works?

- ➡ The controller has several stations as illustrated in the image. Each station is connected to a remote sprinkler solenoid valve through wires (common and individual). The valve opens when it receives a signal from the controller, and the sprinkler connected to the valve turns on. When these sprinklers have run for their allotted time, the controller shuts off the valve.
